Projects

Created about 14 projects, all of which are hosted and can be viewed on my GitHub/Portfolio. Some of

StoryItUp
February *2023 to March 2023*
- Web portal for collection of startup stories from around the world.
- Integrated role based login along with admin view, feature to post custom stories, investor card and much more.
- Created Custom API to allow CRUD operations on stories and user login.
- Built using MERN frameworks.

Matchmingo
March 2023 – Present
- Full Fledge College based dating app where students within the campus can connect with each other.
- Implements features such as socket for real time communication, image compression, eye pleasing animations, user match feature, like dislike buttons, user account creation and much more.

Moviewiki
December 2022
- MovieWiki is a Wikipedia for movies and TV shows. View popular movies and TV shows from across the world. Find out everything there is to know about those, including the cast, reviews, and trailers.
- Worked with TMDB api.

About Me

As a developer, I pride myself on my ability to write clean and efficient code, while also focusing on usability and user experience. I have a strong attention to detail and a passion for problem-solving, which enables me to develop effective solutions to complex challenges. Moreover, I possess strong interpersonal skills and enjoy working in a collaborative environment.
